ABOUT ME

Information Technology student at Bina Nusantara University with a strong passion for web development, UI/UX design, and data-driven applications. Experienced in building full-stack production systems, from edge-deployed serverless backends to pixel-perfect, accessible frontends. Motivated to create digital solutions that are both technically robust and meaningful in real-world impact.

EDUCATION

Bina Nusantara University (BINUS)

2023 to Present

Master of Information Technology | Software Engineering, Data Systems & Modern Web Development

Tarsisius 2 High School

2020 to 2023

Natural Science | Strong analytical and problem-solving foundations

EXPERIENCE & PROJECTS

Intern - Full Stack Developer

Feb to Sep 2026

PT Pancaniaga Indoperkasa, Jakarta, Indonesia

Stack: Next.js 15, React 19, TypeScript, Tailwind CSS v4, Cloudflare D1/R2/KV, OpenNext, Resend, Svix, Zod

- Built a public-facing B2B product portal for Indonesia's leading wine and spirits distributor, featuring a 200+ SKU catalog with multi-criteria filtering (category, brand, country, bottle size, tags), per-product tasting notes, brand profiles, nationwide venue directory, and event calendar
- Developed an internal CMS dashboard with full CRUD for products, brands, events, venues, distributors, publications, and newsletters, including dynamic spec forms that adapt per product category (e.g. Vintage + Grape Variety for Wine, Cask Type + Age Statement for Whisky)
- Implemented Role-Based Access Control (Super Admin / Admin / Staff) with per-module granular permissions, HTTP-only cookie sessions, CSRF protection, and SQLite-backed brute-force prevention
- Built a mass newsletter broadcast system with Tiptap HTML email builder, Resend API batch sending, per-recipient delivery status tracking (sent/pending/bounced), and Svix webhook signature verification
- Engineered a self-hosted first-party analytics pipeline tracking pageviews, unique visitors, device type, browser, OS, and Geo-IP location without any third-party trackers
- Deployed fully serverless on Cloudflare Pages with edge SQLite (D1), object storage (R2), KV-based rate limiting, and automated Cloudflare Zone API cache purge on every CMS save

Freelance - Full Stack Developer

Sep 2025 to Feb 2026

Gym Management System

Stack: React TS, TailwindCSS, Node.js, Prisma ORM, SQLite, Figma

- Led end-to-end UI/UX design in Figma, translating client requirements into high-fidelity prototypes and a fully responsive React interface
- Developed the backend with Node.js and Prisma ORM, designing the database schema and REST API to ensure seamless data flow between client and server

Project - UI/UX Developer

BeeMa - Consultation Management Portal

Stack: Laravel 12, MySQL, Blade Templates, Vite, Figma

- Designed the complete multi-role UI/UX system in Figma (Admin, Lecturer, Student), creating intuitive user flows and interaction patterns
- Translated high-fidelity prototypes into responsive Laravel Blade templates, ensuring accurate design implementation and visual consistency

Project - UI/UX & Frontend Developer

Serenity - Mental Health Consultation Platform

Stack: Figma, React TS, TailwindCSS, Firebase (Auth/Firestore), Midtrans API

- Designed an empathy-driven UI/UX in Figma focusing on accessibility and calming aesthetics tailored for mental health users
- Engineered a pixel-perfect, fully responsive, component-based frontend with React and TailwindCSS, with Midtrans payment integration and Firebase authentication

Project - AI Engineer

Supreme Court Judgement Classification

Stack: Python, Scikit-learn, Pandas, Optuna, Streamlit

- Developed an NLP pipeline using Gaussian Naive Bayes to classify court judgement outcomes, optimized via Optuna hyperparameter tuning
- Deployed the model as an interactive Streamlit web app, enabling real-time legal issue prediction from user-input case facts

Project - UI/UX & Frontend Developer

NoFake - Hoax Verification & Education Platform

Stack: React, TailwindCSS, Firebase (Hosting/Auth), Figma

- Designed a credibility-focused UI/UX in Figma, prioritizing clear information hierarchy and readability to combat digital misinformation
- Built a scalable, fast-loading frontend architecture with React and TailwindCSS to support user acquisition targets

Project - UI/UX & Frontend Developer

PeluangNusantara - Crowdfunding Platform

Stack: Figma, HTML/CSS/JS, Git

- Designed an accessible and trust-building UI/UX for a crowdfunding platform, emphasizing transparency and call-to-action clarity
- Developed the frontend with semantic HTML, CSS, and JavaScript with a focus on responsiveness and cross-browser consistency
